

BOONE'S LANDING

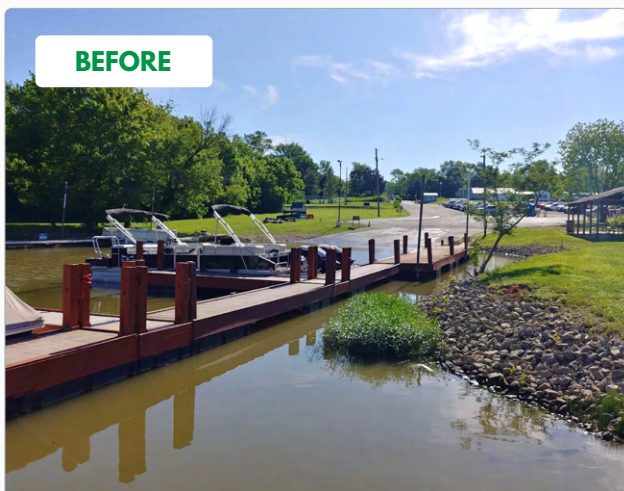

Marina & Kayak Rental Program Public Access at Boone County Parks

OBJECTIVE: Snap Dock's was to replace an aging, deteriorating wooden dock with a modular floating system engineered for fluctuating water levels - improving safety, accessibility, and paddlecraft experience.

Snap Dock

MUNICIPAL & COMMERCIAL CASE STUDY

BEFORE

Aging, splintering wooden docks — safety hazards and constant maintenance

AFTER

Snap Dock's modular floating dock with a dedicated Paddle Port™ kayak launch

PRODUCT OVERVIEW

Boone's Landing Marina, operated by the Boone County State Parks & Recreation Department, sits on a river that feeds directly into the Ohio river, where water levels fluctuate frequently and dramatically. A traditional fixed dock would have limited access during these swings, so the department needed a durable public-access solution built for changing conditions.

The existing wooden docks had begun to rot and splinter, creating safety hazards for families and barefoot visitors. Snap Dock replaced them with its modular polyethylene floating system and a dedicated Paddle Port™ launch, rising and falling with the water to keep the marina and its popular kayak rental program safely accessible year-round.

PROJECT SNAPSHOT

PROJECT TYPE

Municipal Projects

APPLICATION

Public marina & kayak rental access

LOCATION

South Fork River • Boone's Landing, Kentucky

PRIMARY GOAL

Upgrading aging waterfront infrastructure

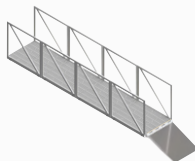

INSTALLED PRODUCT

FLOATING DOCKS

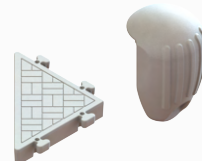

KAYAK LAUNCH

GANGWAYS

ANCHORING

ACCESSORIES

DAY 1

DAY 2

DAY 3

FINAL RESULT

A better waterfront experience for the community

- ✓ Modern modular floating dock infrastructure
- ✓ Safe for barefoot traffic and families
- ✓ Consistent access despite fluctuating water levels
- ✓ Low-Maintenance surface — no rot, splinters, or deck board replacement
- ✓ Improved kayak launch & recovery for all skill levels
- ✓ Modular platform ready for future expansion

FLOATING DOCKS

Modular floating dock configurations designed for public waterfronts, marinas, parks, campgrounds, resorts, and commercial facilities — rising and falling with the water.

PADDLE PORT

A dedicated kayak and paddlecraft launch that provides a stable platform for confidently entering and exiting the water, regardless of changing water levels.

Marinas

“Working with Snap Dock on the Boone's Landing renovation was a great experience from start to finish. The installation process was smooth, the quality of the docks is excellent, and the finished product has made a noticeable difference in both the appearance and functionality of the marina. Our visitors have really enjoyed the improvements, and we're very pleased with the results. Snap Dock was a great partner throughout the project, and we would gladly recommend them to other marinas and look forward to working with them in the future.”
